The Trumbull County Engineer, Howland Township, and the City of Warren are proposing improvements to Genesee Avenue. The project includes the installation of 2,428 feet of new sidewalks, curb ramps, and drive approaches on Genesee Avenue, Nocturne Street, and Tiffany Drive near Elm Road. The project also proposes the installation of two signalized cross walks at the intersection of Genesee Avenue and Elm Road.

The transportation improvement is scheduled for construction in the fall of 2019. The $221,728 project is expected to be completed within one construction season. Traffic will be maintained along Genesee Avenue during construction. Access shall be maintained to all adjacent properties, businesses and intersecting sides streets for the duration of the project.

To ensure the decision-making process is comprehensive, Trumbull County Engineer, Randy Smith, is seeking comments from the public about the social, environmental and economic impacts of this proposed project. Environmental impacts include those involving archeological, architectural and ecological resources, regulated materials and the general location of the project. Trumbull County Engineer also requests information regarding the presence of any known cultural resources in the vicinity of the project including prehistoric and historic archaeological sites, historic bridges, historic buildings, landmarks and districts.

Any questions or concerns about the project should be directed to Mr. Gary W. Shaffer, P.E. by March 29, 2019 at the Trumbull County Engineer’s Office, 650 North River Road, Warren, Ohio 44483 or 330-675-2640.
