Trumbull County Engineer, Randy Smith, proposes to improve West Market Street (C.H. 322) in Warren Township, Trumbull County, Ohio. The project proposes to mill and resurface 1.24 miles of West Market Street from the State Route 5/82 bypass on/off ramps to Lovers Lane. Additional improvements include the replacement of the traffic signal at the West Market Street/Leavitt Road intersection, the replacement of one (1) culvert between Park Road and Leavitt Road, partial-depth pavement repairs, the reconstruction of numerous drainage inlets and the application of edge/center/stop lines and other pavement markings throughout the newly paved section of West Market Street. This $927,000 project is scheduled to begin construction in the summer of 2020.

During construction, traffic will be maintained at all times, except when it will be necessary to close the westbound lanes of West Market Street between Park Road and Leavitt Road for a maximum of five (5) consecutive days to complete the culvert replacement. The official detour for this closure will utilize South Leavitt Road, Burnett Street and State Routes 5/82. Construction, lane restrictions, roadway closure and detour information will be posted along West Market Street and on the Trumbull County Engineer webpage, http://engineer.co.trumbull.oh.us, prior to the start of construction activities. Access shall be maintained to all adjacent properties, businesses and intersecting side streets along West Market Street for the duration of the project.

To ensure the decision-making process is comprehensive, Trumbull County Engineer, Randy Smith is seeking comments from the public about the social, environmental and economic impacts of this proposed project. Environmental impacts include those involving archaeological, architectural and ecological resources, regulated materials, and the general location of the project. The Trumbull County Engineer also requests information regarding the presence of any known cultural resources in the vicinity of the project including prehistoric and historic archaeological sites, historic bridges, historic buildings, landmarks and districts.

Any questions or comments concerning the environmental impacts and/or the proposed project should be directed to Mr. Gary W. Shaffer, P.E. by November 26, 2019 at the Trumbull County Engineer’s Office, 650 North River Road N.W., Warren, Ohio 44483 or 330-675-2640.
