TRUMBULL COUNTY

UPCOMING PROJECT INFORMATION
TRUMBULL COUNTY ENGINEER PLANS
IMPROVEMENTS TO TIBBETTS WICK ROAD IN LIBERTY TOWNSHIP

PID: 104641

Trumbull County Engineer, Randy Smith, plans to improve Tibbetts Wick Road (C.H. 28) in Liberty Township, Trumbull County, Ohio. The project proposes to mill and resurface 1.24 miles of Tibbetts Wick Road from the State Route (SR) 11/Tibbetts Wick Road interchange to SR 193. Additional work includes storm sewer management system improvements, partial-depth pavement repairs, and the application of edge/center/stop lines and other pavement markings throughout the newly paved section of Tibbetts Wick Road. This $715,000 project is scheduled to begin construction in the summer of 2020.

Except where needed to improve the existing storm sewer management system, a minimum of one 10-foot lane of traffic shall be maintained in each direction on the existing pavement or completed pavement during project construction. The replacement of the existing cross culvert between the Pleasant Valley Road/Keefer Road intersection and the entrance drive to Shepherd of the Valley Senior Living Campus will require Tibbetts Wick Road traffic to be detoured for a maximum of three (3) consecutive calendar days. The official detour for this closure will utilize Shannon Road, SR 304 and SR 193. Additionally, the replacement of the existing cross culvert at the intersection of Pleasant Valley Road and Tibbetts Wick Road will require Pleasant Valley Road traffic to be detoured for a maximum of three (3) consecutive days. The official detour for this closure will utilize Prindle Booth Road, Smith Stewart Road and SR 193. Further, the replacement of the cross culvert at the intersection of Keefer Road and Tibbetts Wick Road, traffic will require Keefer Road traffic to be detoured for a maximum of three (3) consecutive days. The official detour for this closure will utilize Naylor Lloyd Road and SR 193. These closures will not occur simultaneously. Construction, lane restrictions, roadway closure and detour information will be posted along Tibbetts Wick Road, intersecting side streets and on the Trumbull County Engineer webpage, http://engineer.co.trumbull.oh.us, prior to the start of construction activities. Access to all adjacent properties shall be maintained at all times during construction of the project.

To ensure the decision-making process is comprehensive, Trumbull County Engineer, Randy Smith, is seeking comments from the public about the social, environmental and economic impacts of this proposed project. Environmental impacts include those involving archeological, architectural and ecological resources, regulated materials and the general location of the project. Trumbull County Engineer also requests information regarding the presence of any known cultural resources in the vicinity of the project including prehistoric and historic archaeological sites, historic bridges, historic buildings, landmarks and districts.
Any questions or comments concerning the project should be directed to Mr. Gary W. Shaffer, P.E. by February 14, 2020 at the Trumbull County Engineer’s Office, 650 North River Road N.W., Warren, Ohio 44483 or 330-675-2640.
